

Applied Clay Science is publishing a special thematic issue of selected papers from the 14th International Clay Conference: Clays and Environment. Saverio Fiore and F. Javier Huertas are acting as guest editors. The authors are gently asked to submit their ms. by 30th October 2009. The manuscripts will undergo the usual peer review rules and procedures followed by Applied Clay Science.

The journal submission, review and decision making are entirely managed online through the Elsevier Editorial System (EES), that is to be found at www.ees.elsevier.com/clay for Applied Clay Science. If you are a **new EES user**, please select [register](#) from the top of the menu and enter the requested information. Otherwise, if **you are an existing EES user** of this journal, select [log in](#) from the top of the menu, enter your username and password, and then click the appropriate login button. Please note that for inclusion in the XIV ICC special issue, "Special Issue: Clays, Health and Environ" must be selected during the "Article Type" step while submission is being carried out.

If your email or any address details should change during the revision process, you can update your EES account by selecting "change details" after you log in.

For further information please contact the Guest Editors at the email address acs@14icc.org
